Release Date: 5/15/2009

PR 10286 Error thrown if kits saved with no item numbers

APP:ERMS

Release Notes:

When saving kits in TQ with no item numbers, the following error is thrown.

"Command text not set for command object"

PR 10273 Deplete on Return

APP:RTMS

Release Notes:

For this case, changes were made so that the deplete_on_ret field would be properly updated when saving tickets instead of being wiped out.

RFM 10265 Modify Invoice export to prefix rental ticket number with T

APP:P21

Release Notes:

A modification was made to the Prophet21 Invoice export to prefix the rental ticket number with the letter "T".

PR 9891 Issue with XOS Print Style

DLL:TICKET

Release Notes:

For this case, changes were made to the report generating code to take the number of items sold unused into account when printing style X tickets

PR 10261 Invoice Cost

APP:RTMS

Release Notes:

The item cost on the invoice was using the inventory cost instead of the bin location cost. This was happening because of the Carry Inventory Item Cost to Tickets preference.

PR 9820 TQ is allowing 1 RA for 2 different job's

DLL:RETURNAUTHORIZATION

Release Notes:

This case corrected an anomaly that occurred when two users clicked on Return Authorization at the exact same moment in time.

PR 10233 Default Bid Style Ignores Print Flag

APP:ERMS

Release Notes:

TrakQuip's default bid print out was including items where the print flag was not set, so code changes were made to correct this.

PR 10283 Pick Item form throws a SQL error if sorted by Description

APP:ERMS

Corporate Services Release Report

Page 2 of 2

Release Date: 5/15/2009

PR 10283 Pick Item form throws a SQL error if sorted by Description

Release Notes:

Fixed a bug in the SQL statement for the Pick Item form, when sorting by description.

RFM 9679 Create Empty and Return (Dump) pricing method

DB:CS_SQL_SCRIPTS

APP:ERMS

DLL:PROFL

DLL:REPORTS

Release Notes:

Create a method by which a user can enter information regarding an Empty and Return, Empty and No Return, Swap Box

Pricing will be based on a Grid

Price Level (Region) will be based on Delivery Zone

Price Level (Customer) will be based on the Customer Pricing Level

Pice Grid (Horizontal) will be based on Sub Category code of the box emptied

PR 10012 Printing of certain Invoices produces error 91-Object variable or block variable not set

DLL:INVOICE

DLL:VRTX

APP:ERMS

Release Notes:

When trying to print or clone certain invoices the system reported error "91-Object variable or block variable not set". This PR fixed the code that was producing that error.

Release Date: 5/18/2009

PR 10296 Receiving more than 500 serialized items causes concurrency and type mismatch error

APP:PO

Release Notes:

Fixed a bug where receiving more than 500 serialized items in PO caused concurrency and type mismatch errors. The PO spreadsheet will now grow to the proper length.

PR 9691 Modifications to the route sheet

DLL:REPORTS

DB:CS_SQL_SCRIPTS

APP:ERMS

DLL:LOGIN

DLL:PROFL

Release Notes:

Made modifications to the route management logic to save the route schedule for each date of the week.
